Economic and financial perspective

In 2024, the Group achieved very positive results, both in terms of the profit obtained by the Group and in terms of the activity of all business lines, which recorded double-digit revenue increases in all areas during the year.

Once again this year, it is worth noting the continuous and sustained increase in the customer base and the high volume of new client assets, which resulted in a significant growth in assets under management and administration, reflecting the soundness of the business model based on specialisation with a high level of quality in client service.

The positive results for the year, together with a high level of return on equity (ROE) and comfortable solvency and liquidity ratios, consolidate the profitable and solid growth trend observed in recent years, which allows us to maintain an optimistic business development projection for the current year 2025, enabling us to continue with a satisfactory shareholder remuneration policy.
